

■ Features :

- *Constant voltage design
- 'Universal AC input / Full range
- 'Fully encapsulated with IP67 level (Note.8)
- 'Withstand 300VAC surge input for 5 seconds
- *Protections: Short circuit / Over current / Over voltage
- *Fully isolated plastic case
- *Cooling by free air convection
- 100% full load burn-in test
- *Low cost, high reliability

□ IP67 **(€**

NOTE	 All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature. Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf & 47uf parallel capacitor. Tolerance: includes set up tolerance, line regulation and load regulation. Derating may be needed under low input voltage. Please check the static characteristics for more details. The power supply is considered as a component that will be operated in combination with final equipment. Since EMC performance will be affected by the complete installation, the final equipment manufacturers must re-qualify EMC Directive on the complete installation again. Length of set up time is measured at first cold start. Turning ON/OFF the power supply may lead to increase of the set up time. In the European market this product is only suitable for LED lighting applications that don t have to comply with the harmonic current requirements of EN61000-3-2 Class C. Suitable for indoor use or outdoor use without direct sunlight exposure.
